

Transcend Industrial Storage Solutions

Powering Energy Infrastructure Without Interruption

Built for mission-critical energy automation, Transcend's industrial SSDs and DRAM modules deliver 24/7 reliability under intense, continuous workloads. With SLC Mode, wide-temperature support, PLP, and optional Conformal Coating, endurance and stable performance during long-term operation are significantly enhanced to support harsh environments common in energy infrastructure.

Conformal Coating

Customized service to prevent storage devices from moisture, dust, and other contaminants.

Data Integrity

Power Loss Protection (PLP) preserves data during sudden power loss.

Enhanced Electrical Protection

DDR5-6400 modules incorporate TVS (Transient Voltage Suppression) protection with CKD design to improve stability and reliability in harsh electrical environments.

Featured Products

SATA III 6Gb/s
2.5" SSD

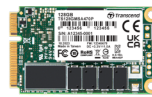

SSD5501

PCIe Gen4 x4
M.2 2280

MTE5601

SATA III 6Gb/s
mSATA

MSA470P

ECC CUDIMM / CSODIMM

DDR5 DRAM Modules
